# CESTA

MONICA ARMANI

CESTA draws its inspiration from traditional basket weaving methods. From ancient plaiting and coiling to modern industrial weaving designed for elevated outdoor style, enjoyment, and durability, today's artisans interpret time-honoured skills using aluminium and rope. Distinguished by clean lines and minimal adornment, CESTA's woven backrest plays the starring role. The sumptuous cushioning complements the sleek frame, while the seat offers gentle movement from side to side.

## FABRICS & MATERIALS

### MATERIALS

**Frame:** Aluminium is a non-ferrous metal, which combines great mechanical rigidity with light weight. This makes it especially suitable for furniture. If treated correctly, it has a good resistance to corrosion. By powdercoating aluminium, this corrosion resistance can even be enhanced. After a chemical pre-treatment, an epoxy powder is applied statically and baked. Tribù always uses European, ultra-durable and scratch-resistant polyester powdercoatings that guarantee a UV-resistance of 15 years. For certain collections (Branch & Illum) parts of the frame are die-cast under high pressure which results in a seamless and extremely solid frame. Additionally, an extra epoxy primer coat is applied for these collections.

**Back:** Canax® is a unique combination of natural hemp and synthetic fibres. Unbreakable polyester fibres give strength and stability. PVC makes the Canax® stain repellent and resistant to outside influences, fungi, frost and UV radiation. The hemp finally, gives the material a surprisingly matte look and a natural touch, almost like leather. Canax® is also a CO2 positive product. As hemp is a natural product, differences in colour and structure may appear, giving the furniture - together with the hand weaving - a unique craft appearance, which cannot be regarded as a fault.

### CUSHIONS

The filling has a cover in a laminated, water-repellent polypropylene material which prevents water from penetrating. The thread used to stitch the seams swells when getting wet, preventing water from penetrating through the seams. Moreover, the seams are protected on the inside with an extra covering. If nevertheless water should penetrate, the material is breathable, letting moisture out to prevent moulding. Fabrics available in category D, E & F.

## HOW TO MAINTAIN YOUR FURNITURE

### MAINTENANCE

**Canax®** Canax® requires hardly any maintenance and is easy to clean with clear water and a PH neutral soap. Stubborn stains and persistent green deposit can be removed with Synthetics Super Cleaner. Use a soft brush to clean between the weave. For extra protection we recommend Synthetics Protector which applies an invisible film and reduces the adhesion of dirt.

**Powder coated aluminium** is easy to clean with clear water and a pH-neutral fluid detergent. Stubborn stains can be removed with Coated aluminium & stainless steel Cleaner. If necessary, use a soft brush to remove the dirt from the pores. To protect the frame against the adhesion of dirt, Coated aluminium & stainless steel Protector can be used which applies an invisible protective film.

### PROTECTION COVERS

For each item a cover is available that protects the furniture against dirt. These covers in grey colour are made of PU coated polyester which is water-repellent and UV-resistant. Thanks to their excellent breathable qualities the covers reduce condensation and heat build-up, helping to prevent the formation of mold and mildew. Nevertheless, they are not 100% waterproof. Always make sure that furniture, cushions and covers are completely dry before covering furniture.
