

HEXAGON

MARC MERCKX

DESCRIPTION

Marc Merckx's Hexagon tables prove that nature is an inexhaustible source of inspiration for new designs. The side tables' teak support refers to the hexagonal basalt pillars of the Giant's Causeway, a rock formation in Northern Ireland that was declared a UNESCO World Heritage Site. Moreover, Merckx swears by sophisticated proportions, which is why the perfect symmetry of the honeycomb was his second source of inspiration. The Hexagon tabletop is made of handcrafted glazed lava stone with a subtle craquelure effect that highlights the natural imperfections in the stone. The enamel layer ensures that the natural stone is water, heat, frost, UV, and stain-resistant.

MATERIALS

- Frame: plantation teak from East-Java
- Top glazed lava stone

PROTECTION COVERS

For each item a cover is available that protects the furniture against dirt. These covers in grey colour are made of PU coated polyester which is water-repellent and UV-resistant. Thanks to their excellent breathable qualities the covers reduce condensation and heat build-up, helping to prevent the formation of mold and mildew. Nevertheless, they are not 100% waterproof. Always make sure that furniture, cushions and covers are completely dry before covering furniture.

MAINTENANCE

Teak

Treat new teak with Teak Protector 4 à 6 weeks after installation. Teak Protector applies an invisible film that prevents stains and green deposit. Soiled teak can be cleaned with Teak Super Cleaner. Leave the furniture to dry completely and then apply Teak Protector. To avoid labour-intensive cleaning, you can treat the wood with Teak Sealer. A simple cleaning with water and a ph-neutral soap will do for many years. Teak Sealer contains UV protection to slow down the graying from the sun as well as a fungicide to prevent the growth of mold and mildew.

Table top

Glazed lava stone is easy to maintain with clean water and a pH neutral liquid detergent. Possible stains can be removed with Glass & Ceramic Cleaner. To protect the surface we recommend Ceramic Protector which fills the micro pores so dirt particles won't attach to the surface and will be rain-washed.
